

Review: Optoma HD80 Home Theater Projector

Contributed by Leslie Karsner

More info...

The Optoma HD80 is a DLP 1080p projector that appears to be very competitive with the best LCD 1080p projectors relative to contrast and image quality

InFocus X10 DLP Projector Review

The InFocus X10 projector is definitely a great combination of brightness and resolution. InFocus out did themselves when they created this little masterpiece. The reviewer at Trusted Reviews thought that this projector was worth much more than the 765.10 (about \$1500) it retails for.

Which LCD or DLP Projector Should I Buy or Rent?

(PRWEB) January 5, 2005 -- Larger rooms and audiences require higher bulb strength brightness. Projector bulb strength brightness is measured in ANSI lumens or lumens. You also need to take into...
